

PRIYADARSHINI ENGINEERING COLLEGE, VANIYAMBADI – 635 751

(Approved by AICTE, New Delhi and Affiliated to Anna University)

QIC REPORT - 2016

1. In response to the circular dated 20.06.2017, I collected consolidated statement of the question paper analysis from all the HOD's and their comments.
2. By analyzing the data and the comments of the HOD's , it is inferred that generally the PART – C questions asked in the question papers are seemed to be indirect but of generally creative and application oriented specifically from the four departments MBA, MCA, CIVIL and MECH.
3. Specifically in the mechanical department the analysis of the question papers reveals that all the questions asked are not direct and from the previous year question papers. The questions do conform to the syllabus but the language used seemed to be difficult for the students to understand.
4. To train the faculty to set the question paper for the Unit test and model examination ask the university questions have been framed, it is suggested that a meeting of the QIC comprising all the HOD's could be arranged and HOD's could be instructed to train their respective department faculty in this regard.
5. Formats collected from the HOD's specifying the consolidated question paper analysis of the subjects in their department are being enclosed here with.
